## Standard Rainwater Systems

Metal Solutions Ltd are the UK's leading manufacturer of traditional copper, zinc and stainless steel rainwater systems.

Rainwater systems in light gauge metals such as copper, zinc and stainless steel are becoming ever more popular as stand alone systems or to compliment a traditional metal roofing finish.

## Leaf Guards

Metal Solutions also provide purpose made leaf guards for all beaded type, half round and box gutters.

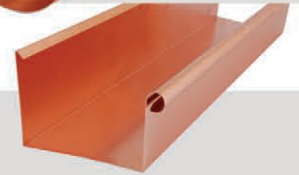

Our systems come in a standard range of 7 gutters and 5 pipes;

110mm diameter half round  
127mm diameter half round  
153mm diameter half round

120mm x 75mm box  
150mm x 90mm box

125mm x 80mm ogee  
150mm x 90mm ogee

80mm / 100mm / 120mm round  
rainwater pipes.

76mm / 100mm square  
rainwater pipes

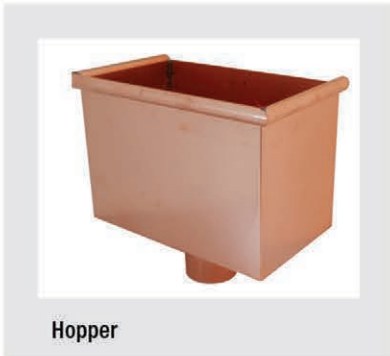

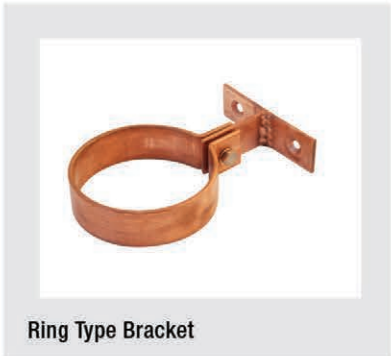

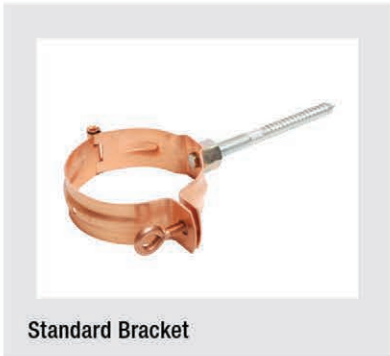

Any other gutter / pipe size  
can be made to order.

# Accessories

Metal Solutions produce a full range of accessories, however any bespoke items can be manufactured to order.

## Bespoke Rainwater Systems

We are also able to manufacture all rainwater systems in coloured zinc, brass, bronze, pre-coated aluminium, GreenCoat steel and any other traditional finish.

This includes all gutter / rwp brackets wrapped in your chosen material.

We can also manufacture from your free-issue material.

## Heritage Rainwater Systems

Metal Solutions can replicate heritage rainwater systems in all traditional metals.

Coloured zinc rainwater goods manufactured from zinc coil.

This Rainwater Systems leaflet is intended as an aid in the understanding of the Metal Solutions Rainwater System and refers to standard situations. The general fully supported metal roofing guidelines must be observed. The data contained in this publication is based on our own practical experience and we accept no liability for the accuracy or completeness. We would always advise that project proposals are checked by an engineer prior to installation.
